Champion, - Alberta

Women's Institute

Upwards of thirty ladies gathered at the home of Mrs. D. Watkins on Tuesday. We heard the excellent and explicit account of the Vulcan conference delivered by Mrs. Chamberlin, then Mrs. Bastin gave us a most interesting and enlightening address on Mental Hygiene, a science which is at present receiving much attention from thinking people. Mrs. Bastin suggested that a group form for the study of this subject, reading matter can be obtained from Ottawa.

This branch is invited to Vulcan Oct. 6th, at 2 p.m. in the United Church Sunday School rooms. Anyone wishing to go let Mrs. Bastin know. She is arranging the transportation.

We are going to have a bake sale on Saturday, Sept. 30, and the president does so want us to get busy on that crazy quilt. Mrs. Hummel and Mrs. Watkins gave us a lovely lunch assisted by Mrs. F. Watts.

A shower was held on Monday evening at the United Church in honor of Master David Gilmore Dawson, the new arrival at the parsonage. Musical numbers were given during the evening including a solo by Mrs. C. McLean, a piano number by Miss Marjorie McCullough and a solo by Miss Mavis Moffatt. A beautifully decorated basket, heaped high with lovely gifts, was graciously received by the mother, Mrs. Dawson, who in a few well chosen words expressed her thanks to the many present.

Threshers need no longer send to Edmonton for their licenses. Municipal secretaries, district agriculturists and weed inspectors will be vested with authority to issue threshing licenses. These officials will be empowered to issue temporary licenses and will issue receipts for money received therefrom. The receipt will be forwarded to the department and a permanent season license issued. Threshing licenses issued for the current harvest season total about 2000. The lesser number issued this year is believed largely due to the late crops.

Coal is one of the industries in the U. S. A. which comes under the N. R. A. plan of higher wages and shorter hours. Higher prices are now being charged for bituminous coal and the anthracite branch of the industry is now being studied. This is of particular interest to coal operators in Alberta. If American authorities are increased in price, Canadian importers will have to pay more for Pennsylvania coal. Ontario and Quebec are large consumers of this coal and an effort has been made during the past few years to place Alberta coal in Ontario and Quebec, but the effort has been met by reduction in price of coal from the U. S. A. Under the new scheme this will be impossible. Consequently the Canadian markets may yet have an opportunity to capture a share of the coal market in the central provinces.

Canada's wheat crop this year is estimated at 282,771,000 bushels of spring wheat and 14,149,000 bushels of fall wheat. This is the lowest since 1924. Alberta's crop is estimated at 103,100,000 bushels.

Local & General

W. Racher was a Stately visitor Sunday.

Mrs. J. F. Harper left for her home in Calgary this week.

Jack Taylor and family have taken up residence in Carman, Ray.

Fleece lined, wool and flat knit underwear, all sizes at Campbell's.

J. Roebuck of Lethbridge, was a visitor in town Thursday of last week.

Mrs. U. D. Smith expects to leave shortly for California, where she will spend the winter.

Miss Curl of Cardston, is a guest at the home of Mrs. U. D. Smith.

Divine worship will be held at Yawood school on Thursday evening Sept. 21st at 8 p.m.

Campbell's have a nice lot of specials, in the mail for you. Check them over and save.

Gunder Nerison was taken to the Vulcan hospital Sunday and is reported to be seriously ill.

The Catholic Women's League will hold a Bake Sale at Farmers' Hardware on Saturday, September 23.

Miss B. Walker announces the re-opening of classes for the teaching of piano at the home of Mrs. D. D. Farmer.

Dr. E. H. Freeze of Champion has been appointed coroner according to the latest edition of the Alberta Gazette.

Miss Jean Hagg, who has been a patient in the Vulcan hospital, returned to her home on Monday.

Mr. E. F. Crawford is making preparations this week to take up permanent residence on his farm west of Champion.

Mrs. J. M. Moffatt and Mavis, who have been holidaying at the coast, returned to Champion Saturday.

Mrs. C. Versluis, who has been visiting at her home here, returned to Millet on Saturday. She was accompanied by her father, Mr. H. Higgins.

Miss Alva Bowman, who has been a guest at her home here for the past two months, left Friday for Edinburg, where she will resume teaching.

Word was received in town of the marriage of Miss Forbes McGillivray on Monday September 4, to Mr. Honeywill of Calgary.

To Ladies! Kayser Hose in all the new Fall shades, 85c to \$1.00 at Campbell's.

The Ladies Aid meeting will be held Thursday, September 21, at the home of Mrs. Lattin, at 2:30 o'clock. All ladies are requested to be present.

The van, containing A. M. Watt's furniture, while enroute to Empress, overturned at Carlsbad. Slight damage resulted to the furniture.

Shooting season for Hungarian partridge opens at noon on Friday, September 15. The bag limit for partridge this year is 15 per day.

B. C. Peaches are scarce. There will be none from Washington. Campbell's advise that you protect yourself at once.

At the theatre next Wednesday night Sept. 20, George Arliss in "A Successful Calamity" A story as modern as celophane and as an extra added feature, The Sharkey Carnero fight pictures.

Reasonable Rates

Energy For The Future

World Has Supply For Many Thousands of Years

Ample energy for mankind's future use is contained in the sun, wind, tide and ocean heat. This is the conclusion of Dr. Arthur B. Lamb, Professor of Chemistry at Harvard University and Director of the university's chemical laboratories.

Each year the world used 17,800,000,000,000,000 kilocalories or as much energy as is contained in 2,700,000,000 tons of coal. If our supply of natural resources were cut off, it would take the labor of 11,000,000,000 men—5 times the population of the world—to furnish the same amount of energy. At present, only 17 per cent of this total is actual human energy while coal furnishes 50 per cent, and the remainder comes chiefly from oil, wood, gas and the labor of domestic animals.

Even these present sources of energy represent but a small fraction of the available supply of coal, oil and gas. The untapped reserves of these three natural resources amount to 2-200 times the world's annual consumption of all kinds of energy, that is, at the present rate of consumption, we can get along for a couple of thousands of years.

But this assurance, pleasing as it may be, is insignificant beside the tremendous stores of energy in sources as yet untapped. Annual solar energy to the earth totals almost 42 times the energy of all the world's energy reserves in the forms of coal, oil and gas. Even combined wind, harnessed, could deliver in one year 70 per cent as much energy as could coal, oil and gas sources during the next 2,000 years.

Too Many Skyscrapers

New York Should Have Limited Building Height Years Ago

In a sense the American city has defeated itself, and New York is a striking example of that defeat. Every new high building on the island of Manhattan has risen at the expense of those below it. Twenty-story office buildings have cut off the air of those of ten stories, forty-story structures have done the same for twenty-story buildings and city skyscrapers have completed the havoc.

The failure of New York years ago properly to limit the height of its buildings has brought to pass that in considerable sections of Manhattan thousands of offices below the tenth floor are practically cellars. Streets have become impassable with automobiles, sidewalks are over-crowded with pedestrians and it has been impossible to build subways fast enough to meet congestion.—New York Nation.

Shutting Out Fresh Air

Movable Glass Screens Endorse Promenades On New York Lanes

All the newer ships have spacious sport decks, and there are accurately measured promenades along the sides of the recreation decks for sunbathing and commodation. But the rest of the ship is closed in as if to shield voyagers from the Atlantic breezes, even promenades are now being fitted at their forward ends with movable glass screens. In ships like the "Europa" and the "Bremen," one may go from end to end of the range of artistically decorated public rooms without running any risk of inhaling fresh air. In such super-luxurious surroundings the passenger may continue from the time he goes on board until he disembarks. It would appear that the physician who recommended a sea voyage as a cure will have to specify the steamer also. Moncton Transcript.

Position She Preferred

"Now," said the bridegroom to the bride when they returned from their honeymoon trip, "let us have a clear understanding before we settle down to married life. Are you the president or the vice-president of this society?" "I want to be neither president nor vice-president," she answered. "I'll be content with a subordinate position."

"What position is that my dear?" "Treasurer."

Give Services Free

Lord Macmillan, Chairman of the Royal Commission on Banking, stated at Vancouver that he was serving without remuneration. Sir Thomas White made a similar confession. Sir Josiah Stamp also conducted the investigation into grain exchange operations without pay. It may be hard to believe, states the Toronto Globe, but there are men who will give time to public service in this way.

Cunning Outwits Dog

Cat When Cornered Uses Clever Tactics To Escape

The mastery of heret which a cat shows when, having been caught in a position from which there is no escape, she calmly sits down to face out the threats of a dog, is a marvelous thing. Everybody has seen a kitten on the street doorstep, attacked by a dog ten times her size, as apparently self-possessed as if she were in her mistress' lap. If she turns tail and runs down the street she is lost; the dog will have a sure advantage of her. Even as it is, if he could get up courage enough to seize her on the spot, he would be able to make short work of her.

"You dare not touch me and you know it," is what her position tells her, that she is intently on her guard, in spite of the air of perfect content. Her legs, concealed under her fur, are ready for a spring. Her jaws are unclenched. Her eyes never move for an instant from the dog; she bounds wildly from side to side, barking with comical fury, those glittering eyes of hers follow him with the keenest scrutiny. If he plucks up his courage, she is ready; she will sell her life dearly. She is watching her chance and she does not miss it. The dog tries Fabian tactics and withdraws a few feet, settling down upon his haunches.

Just then the sound of a dog's bark in the next street attracts his eyes and ears for a moment, and when he looks back the kitten is gone! He looks down the street and starts wildly in that direction, and reaches a high board fence just as a cat's tail—a monstrous tail for such a little cat—is vanishing over the top of it. He is beaten. The cat showed not only more courage than he had, but a great deal more generalship.

Remarkable Plant Found

Belongs To Clover Group And Has Seven Leaves

Discovery of a giant clover with seven leaves, described as "one of the most remarkable plants found in the United States in recent years," has just been reported by J. V. Morton, botanist, of the Smithsonian Institution at Washington.

How such a large and conspicuous species has escaped attention for so long is a mystery to the Smithsonian botanists. It was found growing on sagebrush slopes in Washington by J. V. Thompson, of Seattle, a local collector, and was sent to the Smithsonian for identification.

The new plant obviously belonged to the clover group, which includes hundreds of species growing in temperate climates the world over, but it had a thick stem nearly two feet high and bore heads of flowers close to two inches in diameter. It is described as a perennial herb.

A remarkable feature, for a clover, was that of the seven leaves growing at the end of a leaf stem nearly eight inches long. Most clover leaves are on short stems, or petioles, close to the main stem of the plant. The leaves themselves were long and narrow, like fingers. Those on the plant studies were approximately one quarter of an inch wide and nearly three inches long.

Odd Against Them

The best thing for the average man to do is to stay away from the stock market, says a mathematics professor, who has it figured out the odds are 12 to 1 against the little fellow who is trying to make a killing. The advice is sound as every one knows, although many will be surprised that the professor's computations give the small fry as much of a chance as they do.

Canada has the largest flour mill in the British Empire.

Dream Of The Future

H. G. Wells In New Book Forecasts More Ideal Conditions

H. G. Wells has had a "dream" of what is going to happen in the next couple of centuries.

In this he saw a terrible war and the destruction of the present economic system, to be followed by a new order of things in which there will be no rent, interest or profit, and a full and happy existence will be possible for everyone.

Wells recorded this in his new book, "The Shape of Things To Come," published recently. He traces the history of the world from 1913 to 2146 and paints a picture of a horrible war in Europe in 1940, leading to wholesale death and plague from gas, germs and bombs and collapse of the world system as we know it.

From the ruins rises a reconstructed world, in which, as he puts it: "There remains no way of becoming passively wealthy. Gambling is ruthlessly eradicated. Usury ranks with forgery as a monetary offense. Money is given to people to get what they want and not as a basis for further acquisition. There are no speculators, shareholders, private owners or rent lords."

Ingenuity Of Fire Fighters

Improved An Aqueduct To Carry Water Two Miles

A hastily constructed aqueduct which carried water from a lake more than two miles away enabled Ontario forestry branch fire fighters to bring under control a dangerous bush fire which raged for several days in the north-east corner of Falconbridge township near Sudbury.

Owing to recent dry weather all streams within two miles were dried up. The dry bed of a creek, however, ran close by the fire. The forestry branch men hastily dammed the dry channel and pumped water from a lake through a mile of hose to a point on the creek two miles away. When the water reached the dam it was pumped a short distance further to the lake.

Does Not Happen Often

We can't remember a girl of 20 marrying a man of 60 who was really poor, says the Kitchener Record, and states the Toronto Star, most people can't remember a girl of 20 marrying a man of 40 at all—rich, poor or anything else. In Ontario in 1931 there were 8,020 girls of 20 and under who married, and only 4 of them married a man in the 70-74 age-class. One boy under 18 married a woman of 38.

Wait For Return Of Lake

Irish People Claim Waters Disappear Every Hundred Years

Hundreds of people in the Cleeve area of County Sligo, Ireland, are watching and waiting for the return of a lake 45 acres in extent and 30 feet deep.

It is Lough Na Silt, 16 miles from the town of Sligo, and it vanished with its 52,000,000 cubic feet of water in a few hours before daybreak.

To Irish people it was known as the "Lake of the Evil Eye." According to an old legend the enchanted waters disappear once in every 100 years, to perpetuate the memory of Lough of the Evil Eye, who was slain in the district by the Giant King, Nuada.

In their titanic struggle an eye was knocked out of Balor's head, and—so says the legend—a lake was formed on the spot.

At night the lake is in its usual state, with a full supply of water, but when farmers went to the fields next day they were horrified to find the vanished. Heaps of dead fish lay stranded on the mud flats.

In the lake was found a huge cavity in the shape of an eye. It was 20 feet long and about 18 feet deep.

Lettuce Is Old Vegetable

Used By Persian Kings 500 Years Before Christ Era

The following article about vegetables is from "In A Week-End Garden," by Maude Stewart Delah.

"Egyptians raised an art to cabbage and the Romans and Greeks made it the first dish of the meal. Cauliflower came from Cyprus and the dynasties of Ptolemies worshipped the onion.

Lettuce came to America from the far away Turkish Island, birthplace of Ptolemy II and Hippocrates, and was on the tables of Persian kings five hundred years before Christ. The philosopher, Aristotomus, caused his plants to be sprinkled with wine while growing, to add a delicate touch to his favorite salad."

Enforces Strict Law

Sweden has put new teeth in its "Suicide" law. Anyone who fails to report to the police possession of any kind of a revolver or rifle or shot gun or even the purchase of ammunition is liable to a term in jail. Until just recently only fines have been imposed.

It is almost as hard to say mean things as it is to do them.

FANCIFUL FABLES

JUST A COUPLE OF AUTOMOBILE MECHANICS OUT FOR DINNER

Canadians Played Part In Aiding Assyrians

In 1918 Officers And Men Went From France To Persia

Recent fighting between Assyrians and Kurds along the Iraq border recalls the part played by Canadian soldiers in 1918, when, fleeing from the Turkish hordes, these Nestorian Christians abandoned their homes in the plain of Urmia, and were conveyed to British protection in Mesopotamia.

The story of their uprising against the Turks, under whose rule they had suffered centuries of repression, their resistance over a period of four years, and their final dispersal forms one of the most romantic and one of the most tragic episodes of the Great War. It is not generally known that officers and men of the Canadian Corps, withdrawn from their units in France in 1918 and sent to North-West Persia as part of the British "Hush" army under General C. D. Durrantville, played a notable part in salvaging what was left of the Assyrian race.

It was in 1918 that 40 Canadians were included in this force, which proceeded in dribs and drabs from Baghdad, over the mountain passes into Persia, and on to Kirmanshah and Hamadan.

This was one of the side-shows of the Great War, and like many of its kind, it was unsuccessful in achieving what it set out to achieve. However, its presence in Persia enabled Durrantville, who is the "Stalky" of "Stalky and Co." to bluff the Turkish army around Urmia and Tabriz into inactivity, and prevent invasion of Asia across the Persian Gulf.

The Assyrians desired to return to their fertile lands in the neighborhood of Lake Urmia, but this was quite impossible. The Turkish and the generations of half blood between Christians and Moslems in the Middle East made it inconvenient to re-settle the Assyrians in their own land.

Some were sent to Mosul, the site of the ancient Chaldean city of Nineveh, where they were large numbers of them in Turkish hands and the generations of half blood between Christians and Moslems in the Middle East made it inconvenient to re-settle the Assyrians in their own land.

Some were sent to Mosul, the site of the ancient Chaldean city of Nineveh, where they were large numbers of them in Turkish hands and the generations of half blood between Christians and Moslems in the Middle East made it inconvenient to re-settle the Assyrians in their own land.

Crusade Against Crime

Proposal To Unite Police Forces Of U.S. Into One Huge Army

A revolutionary plan to unite police forces of the United States into one huge army crusading against crime with the backing of the national government and the regular army was placed before the American Bar Association by the man in charge of the government's war on racketeers and kidnapping—Assistant Attorney-General Pat Malloy.

The far-reaching proposal, which contemplated the arming of every law enforcement officer in the country—sheriffs, policemen and all—with federal commissions, came a short time after the association's president had opened the annual convention with a declaration that federal laws were encroaching on the rights of states. The president—Charles E. Martin—also had warned that the crime situation is getting out of hand and that the federal government must take the situation that America is a crime breeding and criminal protecting nation.

Martin also had said that in the absence of court decision, the association should support the Roosevelt reorganization program as a temporary expedient. He had no immediate comment on Malloy's proposal to put the federal government above the states in law enforcement.

Chairs A Distinction

Sir Samuel Hauer Once Suspected Of Political Murder

Sir Samuel Hauer, Secretary for India, claims the distinction of being so far as he knows the only British Secretary of State who was ever suspected of a political murder. For 18 months during the war he was in charge of the Military Intelligence and Secret Service in Russia and he openly were his sources of information that he knew of the Monk Rasputin's murder before anyone except those who were connected with it. "So great an impression did this fact make upon the Czar and his ministers," Sir Samuel revealed at a dinner in London, "that the British ambassador had to make a special visit to Tsar Nicholas to assure the emperor that my staff and I were not the actual murderers."

Served Notables

Francisco Balle, a sleeping car attendant, who is almost a national figure in Argentina, having served President Theodore Roosevelt, the Prince of Wales and 11 presidents of Argentina, has just retired at 64, and will watch the trains go by his suburban cottage.

Boy Leads Marauding Band

Twelve-Year-Old His Absolute Power Over Afghan Tribes

There is a stretch of "No Man's Land" between the administrative borders of British India and Afghanistan. This area is inhabited by the Helmand tribe, who are friendly to British rule in India.

Into this country 4,000 British troops recently advanced to help the animals, who were being attacked by a powerful body of Uffer nomads. All this trouble centred about the figure of a 12-year-old boy, Ghulam Mohi.

This child is known to be the son of an old border leader, but the mysterious and dangerous leader known as the Mad Fakir, who is actually leading these wild frontier parties, is passing him off as a great hereditary ruler.

Surrounded by his 5,000 marauding followers, this boy is kept in a small white silken tent. He is a slight, delicate child, who is said to be exquisitely beautiful. In this dainty tent the boy stays always while, unaided when leading his wild, white-clad Mohi.

Only four men, including the Mad Fakir, are ever allowed inside the tent to see him. They stand deeply before him and mumble some ritualistic prayer. The child then turns on them his huge black eyes, which, they say, have curious mesmeric powers.

His influence over these wild men is absolute. They believe him to be possessed of a magic power from the beard of the prophet.

In India the Mad Fakir is known as the Be-Aki Lennah, the first of those words meaning without.

Beard tinged with red hair, eyes that alternately glister with a piercing intensity and then cloud into those of the most morose and without.

The Mad Fakir is undoubtedly mad—were he not so he would have been dead long before this. But no frontier warrior would so much as touch one whose mind is deranged, and many are willing to see in the affliction the directing hand of Allah.

Consequently the Mad Fakir always has an audience.

Diluted Fast Trip

Speed Of Italian Liner Spoiled Voyage For Passengers

What it takes to establish transatlantic records is illustrated by that trip of the "Rex," says Variety. The Italian Line flagship broke all standing marks for speed across the Atlantic, few the blue championship pennant, rigged itself out in flags and steamed grandly into New York to the accompaniment of columns of newspaper headlines.

But the passengers had a story to tell. Boat was going so fast, some passengers were seasick, the resultant vibration kept them from enjoying the trip, and the nervous handover lingered with them for several days after they landed.

A number of the usual comforts were done away with in the record voyage. The Lido Deck, an open air swimming pool, one of the boat's features, was closed for the trip, captain not wanting the extra water weight burden.

Air-Minded At Ninety

Canada's Oldest Speed Skater Gets Fair For Aviation

Canada's champion 90-year-old speed skater, Joseph Arsenault, is in the news again. Now he has a fair for aviation, and his friends would not be surprised to see the vigorous old fellow attempt to get a pilot's license.

Recently an aeroplane from New York alighted on a field near his home. It brought relatives to see him, and from that time on he has been air-minded. First thing his people knew he was off for Shadblow to see General Italo Balbo's famous air armada.

Type Badly Needed

American automobile engineers looking into the future see a car with such a low centre of gravity that it will be practically impossible to flip.

The car will have such road-holding ability that it will be able to run 120 miles per hour as easily as present machines do at 40.

Until June, 1927, there hadn't been an eclipse of the sun in England since 1724, and there will not be another until 1999.

More than 300 industries are putting air-conditioning in profitable uses.

"No, Ma'am, I 'aven't setn no lady's dress and things."
 "Well, open your right hand then!"

DEMOCRACYS ON TRIAL IN CANADA AS NEVER BEFORE

Newmarket, Ont.—"Democracy is on trial as never before since it became a form of government," Prime Minister R. B. Bennett declared here recently in addressing the Liberal Conservative summer school. The Premier raved here over two speaking engagements in Toronto to address the students.

"In recent years democracies have fallen in Italy, Germany, and Egypt," he said. "The substitution for it of the people the will of the dictator has come about," he remarked, "but we see that man has not been able to evolve a better system than democracy for the good of the country."

The Prime Minister was welcomed by throngs of students at the Earl Grey College, where the school sessions are being held. J. Earl Lawson, Toronto member of parliament and chairman of the school, extended a formal welcome to the Premier, however the school reasserted its prevailing informality.

The defects of democracy Mr. Bennett said are well known and it is realized that its dangers are the steps that should be taken to overcome them.

"I suppose you realize the counting of heads is resorted to to determine vital issues of a democracy, where counting heads would not be utilized for any other purpose. In agriculture in almost every activity in which man engages, more is determined by scientific process. Per government by democracy, he who can count the most heads in his favor is the man to whom the most merit goes."

"Do you ever think what that means? As you have a majority of people untrained, the fate of nations is in the hands of untrained people. The result is appalling to think of."

"I need not recall to you the evolution of the franchise. Perhaps the early criterion of the right to vote."

"That man's mind has always been active that he should share in government of his country and restrictions of property on his exercising his franchise was altered."

"Some of you may recall the correspondence between Cardinal Newman and the poet Keats. Newman pointed out the power vested in a great mass that had not the proper sense of responsibility. The poet, however, the answer of the 20th century. We may the only hope lies in education, in informing democracy."

"My business is to satisfy myself that my views are better than his views in running the affairs of this country."

"Don't be worried by men who espouse this line or that line. My aim is to find the methods of best forwarding the interest of the people. If the other man's means are better than mine, I'll admit them."

"I resent very greatly the definition of a Conservative in some recent newspapers. It means we can conserve all that is good and reject all that is bad. And our intelligence and training tell us what we will save."

Progress, the Prime Minister said, consists of rank recognition of evil and its elimination.

May Remove Restrictions

Runner That Pegged Price On Grain Will Be Rescinded

Winnipeg, Man.—"Runners" is current that the 'peg' will be withdrawn from the wheat market in the near future," states The Winnipeg Free Press in a news page story.

"Officials of the Winnipeg Grain Exchange are silent on the subject but others prominent in the trade believe the price restrictions will be removed at an early date," the paper adds.

Minimum prices for wheat and oats were established August 15 by vote of the exchange membership. The October wheat market was "pegged" at 75¢; December, 71¢, and May, 70¢ cents per bushel, "abnormal conditions surrounding other markets" were given as reason for action.

A vote of the general membership of the exchange will be necessary to rescind the resolution adopted last month.

Reduce Mail Portage

Leedsbridge, Alta.—Ned Cyprien lived as a recluse in a little shack here although he had \$10,000 cash in the bank. After he died it was revealed he had drawn from the bank only \$200 between the years 1908 and 1931.

W. N. U. 1911

Backs Western Farmers

Higher Reward For Services Needs State Hon. J. F. Bryant

Toronto, Ont.—The farmers of western Canada are not a bunch of "Reds" although a few "Reds" are found in their ranks," Hon. James F. Bryant, Minister of Public Works and acting Minister of Agriculture for Saskatchewan, told the directors of the Canadian National Exhibition. He said they are trying to bring about better conditions in rural life.

"They have seen the dawn of a new day, and in any matter which affects agriculture, voice of the western farmer will be heard," declared the minister. The farmer who endeavors to raise on his own farm the means of livelihood for himself and his family, and does not seek to gain wealth as a rule in a comfortable position during the present economic conditions.

"It is not production, but distribution, that is the chief difficulty. The farmer is called to check the constantly increasing supplies and there is a growing belief among our farmers that something is radically wrong with rural life," said Mr. Bryant. "Agriculture must receive a higher reward for services rendered."

Forest Fires in Manitoba

Settlers And Summer Campers Forced To Leave Homes

Winnipeg, Man.—Fire-fighting resources of Manitoba have been taxed to the limit to check forest fires scattered across the eastern and central Manitoba. Outbreaks were reported from 21 districts. Chief concern, however, is in the south-eastern section, where a five-mile front between Rennie and Whitemouth, in the south-eastern portion of the province.

Molten returning to the city found fighting between Rennie and Whitemouth difficult and precarious. Dense smoke from smouldering fires had obscured the highway. Automobiles crawled along through the murky pool with windows closed to keep the smoke from the eyes. More than 100 men patrolled the fire zone, the blaze being reported under control.

Families of settlers and summer campers were evacuated from the danger zone. Only the men remained behind to keep a watchful eye over a fire that destroyed valuable timber stands, razed the station and section house at Rennie, and threatened small settlements before rain came to the aid of forest rangers.

British Farmers Favor National Milk Pool

Overwhelming Majority Shown When Vote Was Taken

London, England.—British farmers have voted overwhelmingly in favor of a national milk pool. The results of the poll showed 94.42 per cent. in favor and 5.58 per cent. opposed. A two-thirds majority was necessary.

With its national and regional pools the scheme will be one of the biggest undertakings in the United Kingdom. Farmers will sell their milk through the pools which will divide the profits among participants according to the amount of milk each delivers.

The national board which will be in charge, will be responsible not only for marketing and supply contracts but will also have the task of utilizing surplus milk for cheese-making and the manufacture of dry milk on a large scale. The board assumes control October 1 for a trial period until the new year when the scheme itself becomes operative.

The scheme applies to England and Wales.

New York Flyer Wrecked

Fourteen Passengers Killed And Many Injured In Collision

Binghamton, N.Y.—Fourteen persons were killed and 25 others injured, some of them so seriously they are expected to die, as a milk train travelling at a fast speed plowed into the Chicago and New York Flyer at Binghamton. The Erie Railroad at the city's eastern outskirts. The flyer, en route to New York, had been stopped by a switch engine at work ahead.

All of the dead were taken from a wooden coach that sandwiched between cars of steel, and three cars from the end of the flyer telegraph line an accident.

M. H. Kling, of Kinross, engineer of the milk train, running between Binghamton and Hoboken, said: "I didn't see the signal light in time to stop. It happened too quickly. We were coming around a curve."

Vice-President R. E. Woodruff, of the Erie Railroad, said the engineer of the milk train was aware he did not have a clear track.

Accepts Important Post

Saskatchewan University Professor Goes To Carnegie Institute At Pittsburgh

Pittsburgh, Pa.—Dr. Lloyd L. Dines, professor of mathematics at the University of Saskatchewan, for the past 18 years, and for the past two years administrative head of the junior college there, has accepted the position of head of the Department of Mathematics at the Carnegie Institute of Technology, at Pittsburgh. President W. C. Murray announces. The position carries a greatly increased salary.

Dr. Dines has long been known as one of the leading mathematicians in Canada and as honored as a fellow of the Royal Society of Canada. In recognition of his successful research work. He was highly appreciated here as a teacher and administrator. He received his training at the University of Chicago.

Professor D. B. Deury will continue Dr. Dines' classes in mathematics during the coming year, Dr. Murray intimated.

CUBANS MUST RESTORE ORDER SAYS ROOSEVELT

Washington.—President Roosevelt threw a protective shield of warships around Cuba while his secretary of the navy hurried about the cruiser "Indianapolis," at Annapolis, for a quick journey to the capital of the island republic.

The president had a company of marines in readiness at Quantico, Va., but he was withholding intervention as the United States sought to restore order in the island.

The battleship "Maine" steamed down the Atlantic coast to stand by off Key West. Six or eight other craft, including a cruiser, destroyers and submarines were within steaming distance of such ports as Guantanamo, Santiago and Havana.

Washington.—Amid fresh reports of Cuban disturbances President Roosevelt called for the speedy establishment of a government to maintain order in the island republic.

Mr. Roosevelt outlined the United States policy to the diplomatic representatives of south and central America, who were called to the White House while American warships were concentrating about the troubled island.

To the spokesmen from the neighboring republics, Mr. Roosevelt said the desire of the United States to avoid intervention and that everything possible to make this unnecessary was being done. He said the aim of the United States policy toward Cuba in this crisis was that the Cuban people obtain as rapidly as possible a government of their own choosing and, equally important, a government that would maintain order.

Have Returned To Ottawa

Ottawa, Ont.—After three months' absence, some of which they spent in western Canada, the Governor-General and Countess of Bessborough have returned to the capital. They were accompanied by their elder son, Lord Dunsany, and their daughter, Lady Moyra Dunsany.

Three Children Burned

Quebec.—Three children, Kathleen, Olive and Felix Jean-Marie, were burned here when they dropped a match in a tin filled with gunpowder. They suffered serious burns and were rushed to hospital at Ottawa. The can of gunpowder had been hidden away in the bottom of a cupboard 25 years ago.

A SCENE FROM THE WHEAT CONFERENCE

Wheat Conference in which delegates from thirty nations met to discuss the world wheat situation.

Our picture was taken after one of the hectic sessions of the World Wheat Conference in which delegates from thirty nations met to discuss the world wheat situation.

opportunity for an international agreement on wheat production. The main feature in the group coming out of Canada House is that of Right Hon. Stanley Bruce, chief delegate from Australia, who played a big part in the proceedings, which concluded harmoniously.

SIDNEY T. SMITH

President of the Winnipeg Grain Exchange, who announced the "peg" of wheat prices for the first time in the history of the exchange, and said the "peg" would remain until the market is stabilized.

Project Has Been Success

Colonization Of Special Kind Working Well In Quebec

Quebec, Que.—The Grancher system of placing with farmers and their families healthy children from city homes where there are cases of tuberculosis was introduced last year and, according to Hon. Athanasius David, provincial secretary, the experiment has been successful. "The children have become adapted to country life and have no wish to return to the cities, and in a number of cases the farmers have gone to the extent of legally adopting the children. This is a good kind of colonization," said Mr. David, who has been delving into the findings of the provincial bureau of health since his return to work after a few months abroad.

The Grancher system gets its name from the year 1868 when the Grancher family, now deceased, organized this system of family placement 30 years ago in the time when public attention in France was turned to the scourge of tuberculosis. The work still goes on in France but it is done under private initiative on the basis laid down by Professor Grancher, and funds are also provided by private people.

Mr. David stated this system in France was based on the project in Quebec without waiting for private initiative to start the work.

Subject To Penalty

Calgary, Alta.—Jobs of Calgary's 2,300 married women, 1,711 are subject to a penalty, which came into effect September 1, because they are behind 100 hours or more on their work cards which contain their record of employment on relief jobs. Many are appealing their cases before relief officials who have started a class check on men refusing to work in return for relief benefits.

Three Children Burned

Quebec.—Three children, Kathleen, Olive and Felix Jean-Marie, were burned here when they dropped a match in a tin filled with gunpowder. They suffered serious burns and were rushed to hospital at Ottawa. The can of gunpowder had been hidden away in the bottom of a cupboard 25 years ago.

Leicester, England.—Applied science, Sir Frederick Gowland Hopkins told the British Association for the Advancement of Science, "science is to blame" for the paradox of poverty amidst plenty and the replacement of human labor by machinery.

Sir Frederick, head of the association, made the statement during his presidential address in which he outlined the strides of science in developing life in terms of chemistry.

"It is not within my capacity," he continued, "to say anything about the paradox and its cure, but I confess that I see more present danger in the case of 'money versus man' than danger present or future in that of the 'machine versus man'."

Concerning the replacement of human labor, he said:

"It is surely right that there is touch with science should insist that it will continue. It need not involve a revolutionary change if there is real planning for the future. No one can say what kind of equilibrium the distribution of leisure is fated to reach, any case as the machine view as the probable effects of its increase may be justified."

Sir Frederick referred to words of Sir Alfred Russel, which he said were still being echoed—"that the command of nature has been put into man's hand before he knows how to command himself."

"I confess," he declared, "that if civilization escapes its other perils I should fear little the final ring of the machine. We should not altogether forget the difference in use which can be made of real and imaginary leisure compared with that possible for very brief leisure associated with fatigue, nor the difference between compulsory toil and spontaneous work."

Fulfilling Pledges Of Economy

Nova Scotia's New Premier Gets Down To Business

Halifax, N.S.—Less than 12 hours after his inauguration as Nova Scotia premier, Hon. Angus L. Macdonald announced his new cabinet's first order-in-council had been a proclamation bringing into effect the provisions of the Nova Scotia Old Age Pensions Act, passed in 1931. He disclosed also the cabinet's initial moves towards fulfilling pre-election pledges of economy.

Estimated savings of \$25,000 annually were effected through abolition of two deputy ministerial posts—those of agriculture and health—and reduction in the number of liquor commissioners from two to one.

In addition, the cabinet appointed three of its members as a committee to ascertain means of further reducing expenditures of government.

Indian Chief Well Known

Head Of Sioux Tribe Dies After Long Illness

Prince Albert, C.—Chief George Kinewakaw, of Grisdale, Man., head of the Sioux Indians in Canada for many years, passed away recently at the House of Commons Indian reserve and was buried September 2, according to word reaching here. The 74-year-old Indian chief was visiting Sioux friends in the reserve and he became ill on August 20 after having assisted in a haying. He had been suffering for years from an internal ailment.

Chief Kinewakaw was one of the best known Indians in Canada. He was one of the central figures in the colorful Winnipeg Board of Trade dinner in 1929, held in honor of veteran Red River settlers and trail blazers of the Canadian northwest. He was a successful farmer at Grisdale.

Loading At Churchill

S.S. Gardania May Be Last Vessel To Take The Cargo This Season

Churchill, Man.—Elevator machinery hummed here with the arrival of the S.S. Gardania to take on what was the last cargo of grain to be shipped from Manitoba's northern port this season.

With her arrival in port, preparations to loading 230,000 bushels of grain were immediately under way and when the "Gardania" steams out of the harbor the 2,000,000-bushel government elevator will have less than a ship's cargo in store. The leftover will total only 38,000 bushels of wheat. She is the ninth vessel to take an overseas grain cargo from the Hudson Bay port this season.

MACHINE AGE NOT TO BLAME FOR ECONOMIC TROUBLES

Leicester, England.—Applied science, Sir Frederick Gowland Hopkins told the British Association for the Advancement of Science, "science is to blame" for the paradox of poverty amidst plenty and the replacement of human labor by machinery.

Sir Frederick, head of the association, made the statement during his presidential address in which he outlined the strides of science in developing life in terms of chemistry.

"It is not within my capacity," he continued, "to say anything about the paradox and its cure, but I confess that I see more present danger in the case of 'money versus man' than danger present or future in that of the 'machine versus man'."

Concerning the replacement of human labor, he said:

"It is surely right that there is touch with science should insist that it will continue. It need not involve a revolutionary change if there is real planning for the future. No one can say what kind of equilibrium the distribution of leisure is fated to reach, any case as the machine view as the probable effects of its increase may be justified."

Sir Frederick referred to words of Sir Alfred Russel, which he said were still being echoed—"that the command of nature has been put into man's hand before he knows how to command himself."

"I confess," he declared, "that if civilization escapes its other perils I should fear little the final ring of the machine. We should not altogether forget the difference in use which can be made of real and imaginary leisure compared with that possible for very brief leisure associated with fatigue, nor the difference between compulsory toil and spontaneous work."

BETTER TIMES INDICATED IN TRADE REPORT

Montreal, Que.—Because, in a general way, Canada's rise to and fall from good times has lagged in point of time behind that of other leading countries, because of the Dominion's power to resist depression, of its efforts to meet the difficult economic situation, of its recuperative ability and of improving world conditions, "the Dominion in the comparatively near future may enter more peaceful waters in which the barques of industry and commerce may again get set for better times."

This is the conclusion of an exhaustive analysis of Canadian conditions during 1932-33 contained in the report on economic conditions in Canada drafted by F. W. Field, his Majesty's senior trade commissioner in Canada and Newfoundland, and made public Thursday, Sept. 7.

Efforts to meet depression may have been the Canadian before normalcy returns, says the report. But "two factors that appear likely to place Canada in a better position to resist depression are, firstly, the nation's own efforts—and opinion seems to be unanimous that these must be drastic in character; and, secondly, the general improvement in world conditions which naturally will find sharp reflections in Canada's trade, industry and business."

The report, some 300 pages long, includes a detailed study of the financial position in 1929, held in honor of veteran Red River settlers and trail blazers of the Canadian northwest. He was a successful farmer at Grisdale.

Includes a detailed study of the financial position in 1929, held in honor of veteran Red River settlers and trail blazers of the Canadian northwest. He was a successful farmer at Grisdale.

Favorable and unfavorable influences on the Canadian situation are listed, the report concluding that generally a foundation for better things during the 1933-34 crop year has been laid. "The much stronger position appears to be developing," the report says.

History of the government's assistance to the wheat pool is given and on this point, the report concludes: "In the view of the government, the wheat pool has developed in the wheat market has undoubtedly vindicated the action taken. The question of ultimate liability will depend entirely upon the future course of wheat prices."

High Quality Of Wheat

Samples Of New Crop Show High Protein Content

Winnipeg, Man.—Protein content of the first 100 samples of new crop wheat from Manitoba was 12.4, with the average for last year, laboratory tests announced recently, reveal. The content is slightly lower than the first-run wheat in Manitoba, but higher in Saskatchewan, according to a report prepared by T. A. Aiken, head of the grain research laboratory of the board of grain commissioners.

Alberta wheat was not available to authorize quality of the present season. Maximum content of 112 samples of No. 1 hard from Manitoba and 66 from Saskatchewan is shown at 17.2 and 16.8 per cent. respectively, as against 15.9 and 14.7 per cent. for the respective provinces.

The average of 344 samples of No. 1 northern from Manitoba was 12.4, while 319 samples from Saskatchewan averaged 14.9 per cent.

Want Game Guardians

Calgary, Alta.—Appointment of a body of game guardians in Alberta, to handle protection of game now done by the Royal Canadian Mounted Police, was suggested to the provincial government by the Alberta Fish and Game Association in its annual convention here. Steps to prohibit shooting of all migratory birds with rifles and modern high power pneumatic guns also was urged.

Heads Medical Council

Ottawa, Ont.—Dr. R. H. Arthur, of Sullivan, Ont., was elected president of the Medical Council of Canada at its annual meeting here, succeeding Dr. W. A. Thomson of Regina. The council is the governing body for the Dominion and has the final say on the examinations which must be passed before a doctor may practice in Canada.

Freight Rate Increase In U.S.

Washington.—United States railroads have asked the Interstate Commerce commission that, effective October 1, when the emergency freight surcharges authorized two years ago expire, they will put into effect increased rates on scores of commodities on which experimental rate reductions had been made to meet truck competition.

Rev. Peter Dawson began his fall work of Religious Education last Thursday afternoon at Fireguard school and will continue this work each Thursday from 3:00 to 3:30. The same work is carried on at Blusson school each Friday afternoon 3:00 to 3:30.

Fred Clever celebrated his 50th birthday recently. The age is due mostly to too much golf and the bestowing of medical advice.

The Ladies' Aid are holding a bazaar sale in U. S. Alexander's office Saturday, Sept. 16.

Mrs. Harry Smith was a tea hostess on Thursday when her guests included Mrs. F. Clever, Mrs. J. McIntyre, Mrs. H. N. Heal and Mrs. H. O. Jopling.

Mrs. C. Boner and Dona wish to express their thanks for the beautiful flowers sent during their recent illness and also for the kind inquiries received.

The wedding dance held at Alton on Friday evening in honor of Mr. and Mrs. Peacock was well attended. During the evening a purse was presented to the bride.

The infant son of Mr. and Mrs. Fred Steeves passed away at his home on Monday evening. Burial was made in the Champion cemetery Wednesday.

Mr. and Mrs. V. McLeod are guests at the home of Mr. and Mrs. H. T. Lamont. Mr. McLeod is a member of the staff of the Canadian Bank of Commerce at Diamond City.

Mrs. C. Boner, who has been a patient in the Holy Cross hospital, returned to her home this week. She was accompanied by Dona, who received medical treatment in Calgary.

Mr. and Mrs. C. Johnson of Quebec, who are now visiting points in the States, are expected to arrive in Calgary this week, where they will visit at the home of their daughter, Mrs. V. S. Jopling and Mr. Jopling.

The Elks are making arrangements to hold a dance in the future, with Hopkins' Old Time orchestra of Calgary in attendance. This orchestra is considered to be the best in the country and a good time is assured.

Normal School opened in Calgary last week with 316 students in attendance. The majority of students this year are candidates for first-class certificates. Miss Elsie McLean of Champion is a student in attendance.

A harvest dance will be held on Friday, October 13th, in the Community Hall with the Hopkins Old Time Orchestra of Calgary in attendance. The Elks are the sponsors and this alone speaks for a real time. This orchestra is famed throughout Alberta. Watch for further particulars.

Gasoline advanced a cent a gallon on Monday, the standard price now being 32 cents a gallon. Rise in price is attributed to increase in American crude prices due to the operation of the National Recovery Act in that country. The increase in gasoline prices will mean a revenue increase for Turner Valley oil companies of \$50,000 a month.
